

Title for Video

Technology in education, Friend or Foe?

How important is technology in education? Can technology cause problems in the classroom?

This video presentation is a discussion about technology and its role in education. It also addresses how to utilize technology in organizations and in particular educational institutions.

The video presents some negative aspects of technology and its impact on education and children's ability to learn and interact socially. The video discusses two articles that demonstrate negatives impacts on education with respect to children as well as a few solutions to increase the efficiency of educational technology.
